

HUSSEIN MUKHTAR

BACKEND SOFTWARE ENGINEER

+20 1111 3177 881 | NASR CITY, CAIRO | HUSSEIN.MUKHTAR@OUTLOOK.COM | WWW.HUSHM.ME
WWW.LINKEDIN.COM/IN/HUSHM/ | WWW.GITHUB.COM/HUSHMKUN

Objective

Backend Software Engineer with deep expertise in **Python (Django/FastAPI)** and **Linux Systems**. Experienced in building high-performance applications (latency < 350ms) and migrating legacy codebases. Passionate about System Administration, Rust/C++, and scalable cloud infrastructure.

Skills & abilities

- **Languages:** Python, PHP, C/C++, Rust, SQL, JavaScript.
- **Frameworks:** Django, FastAPI, Laravel, HTMX.
- **Infrastructure:** Docker, Linux (Arch/LFS), AWS, Azure, CI/CD.

NATIONAL COMPANY FOR ROADS.

Software Engineer | June 2025 – Present.

- Maintained and optimized core Backend services using **Django & Laravel**.
- Managed legacy Android (Java) integrations and optimized SQL Server queries, improving API performance by 35%.

SCADA INNOVATIONS.

Software Engineer | August 2024 – August 2025.

- Developed a scalable and secure web application designed for SCADA system monitoring and control, while keeping system latency < 350ms.
- Utilized **Django** with **HTMX** to build high-performance solutions, ensuring scalability across multiple cloud providers.

MARAKEZ D5.

Backend web developer (Internship) | July 2023 – September 2023.

- Expand and support multiple **Django/Flask** applications.
- Collaborate with cross-functional teams to optimize website performance, user experience, and SEO.

SUEZ UNIVERSITY

Education

Suez | BS in Computer Science | 2020 - 2024

earned a 3.1 GPA and completed relevant coursework in software engineering, Cloud, database management, and web development.

GRAYSON TOWNCAR.Joint Venture | June 2025 | [Live Link](#)

- Co-developed a responsive booking platform for a private transportation service, featuring a custom "Instant Quote" engine with dynamic fare calculation based on complex route logic (Airport, Disney, Port Canaveral).
- Implemented a secure, multi-step reservation system that manages vehicle choice, add-on management (car seats, grocery stops), and automated customer notifications.

ANUBIS.

Graduation Project | September 2024

- Architected a custom Linux distribution (LFS) to demystify kernel operations for students.
- Integrated an embedded AI assistant to provide real-time CLI command explanations and error debugging.
- Optimized kernel configurations for stability, achieving a lightweight footprint suitable for older hardware.

STATUS.Server Monitoring System (Open Source Contribution) | March 2025 | [Link to GitHub](#)

- Led the architectural migration of a legacy monitoring tool to **Django**, implementing remote server health tracking APIs.
- Developed RESTful **API** for connecting with an Android and/or iOS app.
- Collaborated with **Flutter** developers to create the app Using Version Control (GitHub).
- Implemented **CI/CD** pipelines to automate testing and deployment.

WEDDA MARKETING AGENCY.Freelance Job | Jan 2025 | V2.0 | [Live Link](#)

- Engineered a high-performance corporate portal using **Django**, implementing strict caching strategies for sub-second load times.
- Implemented Django's best practices to allow the user full editing capabilities.

AL-AWAL MEDICAL FACTORY.Freelance Job | December 2024 | [Live Link](#)

- Delivered a secure B2B catalog platform, utilizing **HTMX** for dynamic content loading without full page refreshes.
- Used Django, HTML, CSS and HTMX to provide a satisfactory and easy UI/UX.

TURJMAN.

Freelance Job | June 2024

- Implemented **Role-Based Access Control (RBAC)** to manage permissions for authors, editors, and regular users.
- The site served as a Full news site with authors, categories and posts, User Authentication & Authorization, anyone could Sign Up and comment on any post.
- The author could post, edit and remove any post of their own.
- Deployed and configured the application on a **Microsoft Azure** instance, managing DNS and security groups.
- Served as a graduation project for a Media faculty team.
